

CTS Container & Trailer Services Ltd.

Offshore Fleet – Drill Cuttings Bins

The Drill Cuttings Bins we have in our Offshore Fleet have been proven to be among the strongest and safest available today. Designed in conjunction with MI Swaco, our Drill Cuttings Bins are built to withstand the most severe of impacts meaning its toxic contents will not be discharged in the event of a collision.

These vacuum rated units are stackable thus saving valuable storage space and they have a convenient double lid arrangement complete with filling connection and pressure release valve for safe and easy access during loading, transit and emptying. We believe our Drill Cuttings Bins are the most user-friendly unit of its kind available.

Specifications include:

Size (L x W x H)	2.6m x 1.5m x 1.7m
Vacuum Rating	Design Pressure = 11psi
Capacity	25BBL/4.0 cubic metres
Payload	8,350kgs

Like the rest of the CTS Offshore Container Fleet our Drill Cuttings Bins built to the highest standards using only the best materials and technicians.

They are available for hire today from our Dartmouth, NS and Trinidad Depots.
